Two New Videos: Explaining the City Blueprint Approach

CITY BLUEPRINTS - Improving Implementation Capacities of Cities and Regions (AG041) is an action group of the European Innovation Partnership on Water (EIP-Water). City Blueprints are also part of Watershare® (expert tools for the water sector).

Video 1 (CBA1)

The City Blueprint Approach is a diagnosis tool and now consists of three complementary frameworks. The main challenges of cities are assessed with the **Trends and Pressures Framework (TPF)**. How cities are managing their water cycle is done with the **City Blueprint Framework (CBF)**. The methodology and examples are provided in this video. The link to the video on YouTube can be found [here](#).

Video 2 (CBA2)

The City Blueprint Approach is a diagnosis tool and consists of three complementary frameworks. Where cities can improve their water governance is done with the **Governance Capacity Framework (GCF)**. This is a new framework and is highlighted in this video. The methodology and examples for Quito, Amsterdam and Melbourne are provided. The link to the video on YouTube can be found [here](#).
