

Water & Irrigated agriculture

Resilient Europe

WI**RE**

Water & Irrigated agriculture Resilient Europe

WI**RE** will **facilitate innovation uptake** in the complex, multi-faceted irrigated agriculture reality and market. In the climate change context irrigated agriculture will be crucial in view of **securing food production** and further contributing to stabilise rural populations. Existing or upcoming innovation will be customised to the **farmers' needs**.

The three priorities:

- **efficient water reuse in irrigation**
- **energy saving in irrigation**
- **integrated agricultural water management under drought**

The WI**RE** galaxy:

12 countries
2 international bodies

Linked to:
EIP-AGRI
WssTP
JPI Water

Connected with 13
ongoing EU projects

48 partners

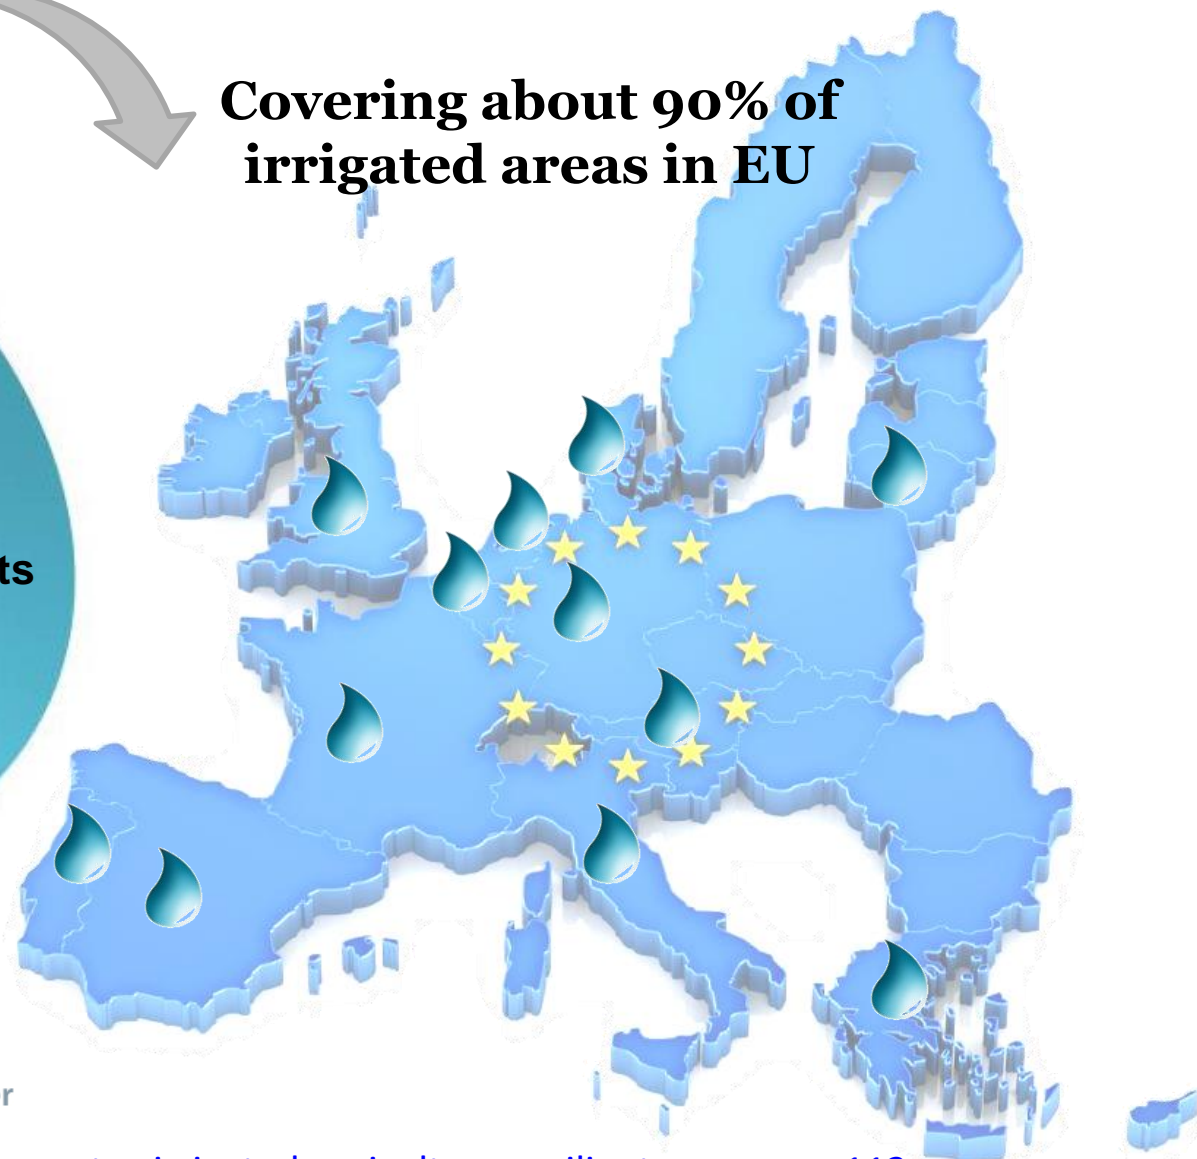

14 pilot-demonstration sites

To facilitate uptake of innovative solutions by farmers,

WI**RE** will bridge with the EIP-Agri.  eip-agri

AGRICULTURE & INNOVATION

Covering about 90% of irrigated areas in EU

 EIP Water

Boosting opportunities – Innovating water
